Nap, a Place to Take a Break

The new sofa collection designed by Andrea Steidl for LaCividina

20/05/2019 - The **Nap** selection of padded furniture designed by **Andrea Steidl** for **LaCividina** presents a fresh take on traditional pillows in an extra-large, sartorial form. Both the name and the shape of this soft, smart collection of sofas evoke the idea of restfulness.

Cosy composure

Nap showcases LaCividina's outstanding craftsmanship. The seams are designed to give even more of a plump appearance and highlight the softness of the "pillow-like" parts of the seat, such as vertical piping and horizontal darts that help to make it snug and sumptuous.

Extra comfort is added by the lumbar support cushion, which is attached to the backrest by a concealed zip. It gives the sofa a tidy appearance that is ideal for both the busier settings of the contract market and household environments.

A mini and maxi balance

The finishing options that are available for the Nap selection are just as welcoming as the shapes, with a wide range of colours and covers on offer. Rounding off the structure are feet with a minimalist design that almost entirely disappear from view under the magnificent seat.

Versatile style

Thanks to the sartorial appeal of the covers and the soft padding of the practical, comfortable Nap sofas, they are ideal for both the contract market and living rooms in private homes.
